Jonathan Benn

Los Angeles, CA
JonathanTBenn@gmail.com
LinkedIn.com/in/Jonathan-Benn
Github.com/bonjenn

Full-stack engineer with **6+ years of experience** designing and deploying scalable **web, mobile, and desktop applications**. Strong background in **React, Angular (v10+)**, **Python (OOP, Flask, SQL Alchemy)**, **Swift**, and modern frontend frameworks. Skilled at building **RESTful APIs** and writing **API documentation using Swagger/OpenAPI**. Experienced with **CI/CD pipelines**, **Git**, and **Agile development practices**. Passionate about crafting elegant UIs and efficient backend architectures that merge creativity with technical precision.

Core Competencies

Languages: TypeScript, **JavaScript**, **Python**, HTML/CSS, SQL, PostgreSQL
Libraries & Frameworks: React, **Angular (v10+)**, Next.js, Express, TailwindCSS, Swift, Metal, Node.js
ORM & APIs: SQL Alchemy, **RESTful API design**, **Swagger/OpenAPI documentation**
Technologies & Tools: Claude Code, Codex, Git, **CI/CD pipelines, Expo Updates (EAS Update), OTA updates**, AWS Lambda, MongoDB, Supabase, Firebase, Figma, GitHub
Practices: Agile methodology, **Object-Oriented Programming (OOP)**, Test-Driven Development (TDD)

Professional Experience

Dialed Labs – Costa Mesa, CA | 12/2025 – Present
Lead Mobile Software Developer: React Native, Expo, TypeScript, Firebase, Next.js

- Lead development of cross-platform iOS and Android applications using React Native, Expo, and TypeScript.
- Architect and maintain Firebase-based infrastructure including Authentication, Firestore, Cloud Functions, Cloud Storage, Analytics, and Push Notifications..
- Establish engineering standards, CI/CD workflows, release processes, and code review practices across the mobile development lifecycle.
- Collaborate with product, design, and executive stakeholders to define technical roadmaps and deliver high-impact features.
- Manage App Store and Google Play releases and use Expo Updates (EAS Update) to deliver over-the-air JavaScript and asset updates.
- Integrate third-party services including analytics, payments, notifications, and customer engagement platforms.

Muha Meds – Costa Mesa, CA | 12/2025 – Present
Lead Mobile Software Developer: React Native, Expo, TypeScript, AWS

- Lead development of consumer-facing mobile applications serving **300,000+ users** across iOS and Android platforms.
- Build scalable cloud-connected mobile experiences leveraging AWS services and modern React Native architecture.
- Design and implement reusable application components, navigation systems, and state management solutions to improve development velocity and maintainability.
- Collaborate with cross-functional teams to deliver new features, optimize performance, and improve user engagement metrics.
- Support backend integrations, authentication systems, API connectivity, and cloud infrastructure supporting large-scale mobile operations.
- Drive weekly release cycles, quality assurance processes, and production deployments.
- Provide technical leadership on architecture decisions, engineering best practices, and long-term platform strategy.

Vantaview – Los Angeles, CA | 11/2024 – 11/2025
Fullstack Software Engineer: ***Swift, Metal, React, Node.js, Supabase***

- Architected a **real-time video engineering SaaS** using **Swift, Metal, and AVFoundation**, delivering low-latency rendering pipelines optimized for macOS and future iOS expansion.
- Engineered a **modular Swift architecture** with reusable rendering layers, dynamic video compositors, and GPU-accelerated effects to support multi-display live video workflows.
- Integrated **Supabase** for authentication, real-time sync, and cloud storage, building a unified backend infrastructure for user management and project persistence.
- Developed **marketing and onboarding web apps** in **React + Supabase**, enabling user account creation, tiered subscription handling, and seamless app distribution.
- Established **CI/CD pipelines** and **Git-based code review practices** to ensure scalable releases and maintain code quality across multi-platform development.
- Collaborated cross-functionally on product strategy, UX flow, and technical roadmap, translating production engineering challenges into elegant, performance-driven software solutions.

LavPass – Los Angeles, CA | 02/2024 – 06/2025
Fullstack Developer: **React, TypeScript, Node.js, Supabase, Figma**

- Engineered a **location-based SaaS platform** enabling users to share and verify public restroom access codes in real time, built with **React, TypeScript, and Supabase**.
- Designed and developed **scalable, reusable React components** with optimized state management to improve performance and maintainability across multiple views.
- Integrated **RESTful API endpoints** and **real-time subscriptions** to synchronize user-generated content and ensure live data accuracy.
- Collaborated closely with UI/UX designers in **Figma**, translating wireframes into pixel-perfect, responsive interfaces aligned with the brand's visual identity.
- Implemented **authentication, data validation, and analytics tracking**, supporting secure, data-driven feature rollouts for thousands of active users.

City of Los Angeles – Department of Recreation & Parks | 06/2019 – 09/2023
Software Engineer: ***React, MongoDB, Supabase, Firebase, Node.js***

- Re-designed and maintained the Pershing Square website, boosting traffic and event ticket sales by 20%.
- Built CMS infrastructure enabling non-technical staff to update website content independently.
- Implemented backend integration with Firebase and Supabase for reliable real-time data updates.

Education - University of Arizona — Information Science & eSociety, Minor in Computer Science
